

where's your blood sugar level heading today?

If you're having difficulty with your metformin-based diabetes medication, you may be eligible for this study.

Today, local doctors are conducting a medical research study evaluating the safety and effectiveness of an investigational oral medication to see if it helps control blood sugar levels in Type 2 diabetics.

To be eligible for this study, you must be:

- Between the ages of 18 and 80 years
- Medically-diagnosed with Type 2 Diabetes
- On a metformin-based medication within 8 weeks prior to screening, OR have made lifestyle modifications such as with diet and exercise, OR are doing both (metformin medication with lifestyle modifications), but have not seen any success with lowered blood sugar levels.

Qualified participants will receive study-related medical evaluations and investigational medication at no cost. Reimbursement for time and travel will also be provided.
